Unit 4
Lesson 2

Using Data Cleanse Transforms

LESSON OVERVIEW
In this lesson, you will learn how to use data cleanse transforms.

LESSON OBJECTIVES
After completing this lesson, you will be able to:

- Use data cleanse transforms

Data Cleanse Transform

A default installation of Data Services with the Data Quality transforms includes several basic Data Cleanse transform configurations. A default transform configuration, EnglishNorthAmerica_DataCleanse, and is preconfigured to cleanse name, title, firm, date, phone, Social Security number (SSN), and e-mail data using English-based data quality rules.

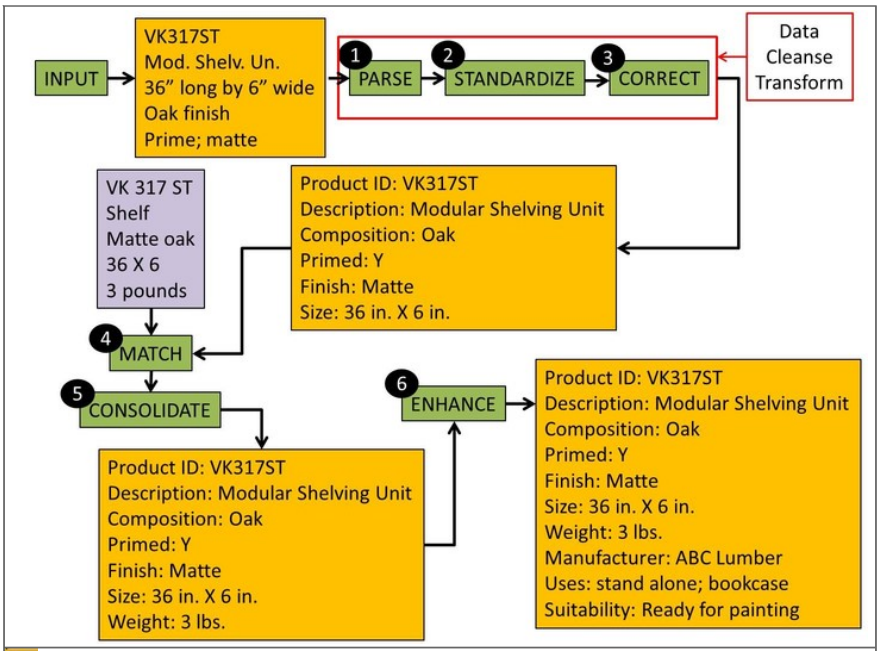

Figure 21: Data Cleanse Transform

Other Data Cleanse transform configurations are preconfigured to cleanse name, title, firm, data, phone, and e-mail data using data quality rules specific to Dutch, French, German,
